Welcome to the XXVth ESRS Congress!

On behalf of the Scientific Committee I bid you a warm welcome to the XXVth conference of the European Society for Rural Sociology in Florence.

The theme of the current conference is "Rural resilience and vulnerability: the rural as locus of solidarity and conflict in times of crisis". When composing the call in early 2012, the economic crisis was at the top of everybody's agenda and it was clear that rural resilience could never be talked about without considering the effects of the crisis. And we were right I would say, as the crisis still holds Europe in its grip and changes our life in small but persisting steps. The crisis presents us with the chance to rebuild our society, to rethink our style of living and to create something more sustainable, socially as well as ecologically. But there are also great risks as the crisis increases inequalities, between people and places, within and between countries, endangering the European project as such. The rural is one of the places where these chances and risks are played out, reflecting resilience as well as vulnerability.

This conference hopes to increase our knowledge of the effects of the crisis throughout the different urban and rural regions of Europe and beyond, and to add to our understanding of the processes that contribute to 'vulnerability and resilience of people and places'. This will take place through plenary presentations and discussions and in the many workgroups that are presented in this programme, and which elaborate on the conference theme more in-depth.

This conference is the 25th ESRS conference. We did our best to continue a tradition of thought provoking and joyful conferences. As an experiment we added something new - the e-proceedings in which participants could choose to publish a short version of their page on the conference website prior to the conference (see http://www.florenceesrs2013.com/proceedings/). We hope it will be of value and support the exchange of ideas and debates throughout the working groups.

Organising the ESRS conference would not be possible without the effort of many people. I would therefore like to take this opportunity to thank the scientific committee members for their enthusiasm, engagement and enjoyable collaboration. I would also like to thank Gianluca Brunori, the local organizing committee and the scaramuzzi team, who did all the work here in Florence. Thanks to the ESRS executive board for their confidence and support, and above all thanks to all of you for convening working groups, presenting papers and participating in the conference.

A warm welcome to all of you. I hope you will enjoy the conference and your stay in Florence, one of the most beautiful places in Europe

A change for reorentation

The economic crisis has Europe in its hold. This crisis clearly affects its economic basis but goes far beyond that to touch upon the very substance of the European way of life. Yet, the crisis also presents us with the chance to rebuild our society, to create something better, more valuable and more sustainable. Resilience is often used to describe this capacity for successful adaptation, i.e. the ability to learn and change, to make use of emerging opportunities. But there are also risks as the crisis increases inequalities and internal tensions, at different levels (such as regions or nations).

The opportunities and risks associated with the crisis are played out in rural as well as urban places. Rural places and rural issues may assume a specific meaning in times of crisis, reflecting resilience as well as vulnerability. This conference aims at increasing our knowledge of the effects of the crisis in the different regions of Europe and beyond, and to add to our understanding of the processes that contribute to vulnerability and resilience of people and places.

The increasing attention to sustainability issues, to 'green' production and consumption is one example of the opportunities that the crisis has to offer. Step by step, norms such as frugality and moral appeals to restrict ourselves enter the dominant discourse. Calls for social, political and moral reorientation are getting louder as well and attracting a wider audience. They question the on-going economization of public life and seek support for other than economic values; they question remorseless competition and encourage cooperation. Citizens have begun to demand that politicians demonstrate personal integrity, absence of self-interest and ability to limit the power of the greedy global economy and rebuild a cohesive society. The reorientation of the EU 2020 agenda from sustainability toward resource efficiency and social innovation may be seen as confirming this trend.

The risk involved

But there are also big social as well as political risks. The retrenchment in public expenditures has a profound effect on many citizens, and especially social groups with small and insecure incomes, or other vulnerable groups such as the young, the sick and the elderly. These groups are the most dependent on direct public support (for example child allowances and study grants), and they are most affected by cut backs in the budgets of (semi) public institutions such as in education, health care and social welfare. As a result social inequalities within countries are increasing.

Similarly, social and economic inequalities between countries are growing, and the widespread nature of these inequalities threatens European social cohesion. The crisis importantly affects our feelings of solidarity, increasing rivalry and conflict. Whereas previously united as equal Member States in the prosperous European Union, cultural differences become emphasized again with a focus on the darker sides of each other's presumed identity. It may even be argued that the European Union itself is at stake. This leads to accusations between countries of immoral behaviour and unfaithfulness, to the resurgence of old (national) prejudices and resentments

The rural as locus of both vulnerability and resilience

The above mentioned dynamics influence the rural. Indeed, the rural is one of the places where cutbacks in spending are felt most severely. Rural poverty increases when it increases elsewhere. We may also expect the situation to be most difficult for the already poor, remote rural areas where people lack resources to fall back on. In the course of the crisis, more rural regions may become impoverished causing more people to leave rural areas, reinforcing existing migration trends in what becomes a downward cycle. Given the difficult situation in southern Europe, migration routes may become redirected towards the northern and western Member States. This would add to the already existing tensions, reinforcing political unwillingness to accommodate inner-European migration.

However, 'the rural' is also a locus for social innovation and resilience, building on social capital and values such as thriftiness and solidarity. Indeed, urban citizens are moving to the countryside searching for a higher quality of life, a way of life that values time and places less emphasis on consumption. Young people are once more interested in agriculture and farming. The increasing outreach of urban food movements offers new, creative opportunities. They promote sustainable food production and consumption, while emphasizing issues such as social justice and food sovereignty. Overall, a wide range of innovative arrangements are being experimented with, testifying of the resourcefulness of rural actors, to their creativity and to their ability to recognize the opportunities that emerge from the crisis.

On behalf of the ESRS Scientific Committee, Bettina Bock

Locations

Palazzo Vecchio – July 29, 2013

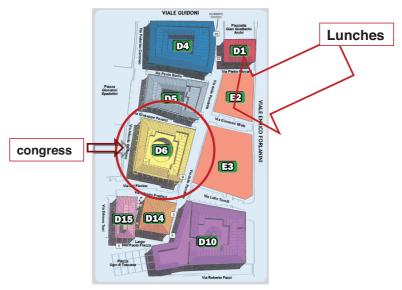

The opening ceremony will be hosted in the famous and prestigious Salone dei Cinquecento in Palazzo Vecchio.

Palazzo della Signoria, better known as Palazzo Vecchio, has been the symbol of the civic power of Florence for over seven centuries. Built between the end of the thirteenth century and the beginning of the fourteenth to house the city's supreme governing body, the Priori delle Arti and the Gonfalonier of Justice, over time it has been subject to a series of extensions and transformations.

Its current appearance is mainly due to the splendid restoration work and interior decoration carried out in the mid-sixteenth century to adapt the building to its new function as ducal palace as ordered by Cosimo I de' Medici. After the transfer of the Medici court to Palazzo Pitti, it continued to host the Guardaroba (where the ceremonial costumes and family treasures were stored) and various governmental offices, until it became the seat of the Florence City Council in 1871.

Polo di Novoli – July 30 – August 1, 2013

The Congress will be held, from the 30th of July to the 1st of August in D6 building in the Polo di Novoli. All the rooms are in this building, where will also be the coffee breaks.

Social Events

Goodbye party August 1st, 2013 20:00 Palazzo Borghese Via Ghibellina, 110

Participants will receive at registration their ticket for the Goodbye Party. Name tags must be carried at each event. Additional tickets are available for purchase at the registration desk, subject to availability. The dinner will be hosted in a historical palace in the heart of Florence, Palazzo Borghese, whose origins date back to 1400, when it belonged to the Salviati Family, and was later inherited, during the XIXth Century, as one of the many properties of the Borghese family, whose coat of arms still dominates the main facade.

ESRS General Assembley July 31st, 2013 Reserved only to the ESRS members. Meeting Point: 16:15 Secretariat Desk

The ESRS General Assembly will be hosted in the wonderful Auditorium "Cosimo Ridolfi" thanks to Banca CR Firenze. Situated in the Novoli area, just 10 minutes walk from the congress venue, this palace is part of an amazing project of the bank started in 2003, in which we can find different palaces all around a quadrangular garden and all connected with a corridor that remind the Vasarian Corridor. The auditorium is dedicated to

Cosimo Ridolfi, historic founder of the Bank.

The City of Florence

The Historic Centre of Florence, enclosed by a circle of avenues traced over the old medieval city walls, was inscribed in the World Heritage List in 1982 during the sixth session of the UNESCO World Heritage Committee. Full of beautiful, Renaissance-style buildings, including wonderful churches and elegant palaces, Florence is steeped in culture and atmosphere and has not changed greatly since the 16th century. The mingling and the mutual interaction of ancient and modern culture make Florence a magical, enchanting and inspiring city.

At the time of Charlemagne, Florence was a university town. Today it includes many specialized institutes and is an international cultural centre. Academies, art schools, scientific institutes and cultural centers all contribute to the city's intense activity.

Florence is also a busy cosmopolitan centre which offers in every season of the year many traditional music and theatre festivals, historic cafes, excellent restaurants with international cuisine as well as picturesque "trattorie" serving the best regional Italian food. Italy is a world leader in manufacturing, design, fashion, and Florence is no exception. Gold or silver jewelry, antiques, leather goods, and stylish clothing are among the top buy's of Florence shopping.

The city's inventiveness, initiative and originality have always been a source of attraction for international conference tourism and can offer modern, efficient, and impressive conference premises in such a suggestive and appealing urban setting.

Florence attractions

Florence transmits a multitude of emotions and sensations to all travelers: scents, flavors and works of art stimulate the senses step after step and remain engraved on the memory. Surrounded by lovely hills, Florence is an open air museum which houses some of the most precious treasures of Italy including the Cathedral with its splendid Dome designed by Brunelleschi, Giotto's Campanile, the Uffizi Gallery, and much, much more. But it is the hidden and lesser known Florence that will remain in your heart: the Florence of the tiny artisan workshops which hand down ancient techniques from generation to generation, the small churches and street markets, traditional "trattorias" and places off the beaten path. Florence has a unique artistic heritage, a glorious testimony to its secular civilization. Cimabue and Giotto, the fathers of Italian painting, lived here, along with Arnolfo and Andrea Pisano, reformists of architecture and sculpture; Brunelleschi, Donatello and Masaccio, founders of the Renaissance; Ghiberti and the Della Robbia dynasty; Filippo Lippi and Fra Angelico; Botticelli and Paolo Uccello; the universal geniuses Leonardo da Vinci, and Michelangelo. Their works, along with those of many generations of artists up to the masters of the present

century, are gathered in the city's museums. Firenze Musei is a network of thirteen state museums in Florence (Accademia Gallery, Uffizi Gallery, Palatine Gallery, Silver Museum, Gallery of Modern Art and Costume Gallery, Medici Chapels, San Marco Museum, Bargello Museum, Cenacolo di Andrea del Sarto, Davanzati Museum, Boboli Gardens, Archaeological Museum, Museo dell'Opificio delle Pietre Dure) housing works of art from most of the collections of the Signori who ruled Florence (the Medici and the Lorraine families) as well as some works originally belonging to ecclesiastical bodies that fell into the hands of the State as a result of the 19thcentury suppression of religious bodies. Florence surroundings are equally enchanting and picturesque. The softly rolling hills of the Chianti which spread over the provinces of Florence, Siena, and Arezzo are full of charming small towns to explore. Pisa, with its worldwide famous Piazza dei Miracoli, and Siena, whose medieval centre has been declared by UNESCO a World Heritage Site, are only 80 Km from Florence. Visitors from abroad will especially appreciate San Gimignano (60 Km from Florence), a small walled medieval hill town, mainly famous for its towers.

Weather

The climate in Florence is typically Mediterranean, with high temperatures and sunny days in the summer and colder, damper weather in the winter. In the spring and autumn, temperatures are at their most comfortable and pleasant. Italy's time is 1 hour ahead of Greenwich Mean Time (GMT+1).

No Smoking Policy

Smoking is prohibited in Italy in all public buildings, restaurants, bars, and public areas in hotels.

Money

Italy's unit of currency is the Euro. Coins have values of 1, 2, 5, 10, 20, and 50 cents, 1 € and 2 €. Notes have a value of 5, 10, 20, 50, 100, 200, and 500 €. Foreign currency can easily be exchanged at banks and exchange counters, for example at the airport. Visa, Master Card, Maestro, and Cirrus are accepted by most shops and restaurants, and some also accept American Express. Most bars and small shops only take cash.

Electricity

Electricity is supplied at 230 volts, 50 hertz, which most small adapters (for laptops and mobile phones) from anywhere in the world are compatible with, although checking for this on the adapter before plugging in is recommended.
